

## Linksys PAP2T Configuration

Dear Customer,

Thank you for subscribing to **Eyesurf's Digital Phone** service. This document outlines the steps required to successfully configure your Linksys ATA, in order to use your Digital Phone service.

It is recommended that you fully read this document prior to configuring your device, so that you are aware of all the steps.

Please follow the directions below. If you get stuck at any point, feel free to call our technical support centre at 519-804-SURF (7873)

1. Connect the AC power adapter to your Linksys ATA, and plug the power adapter into the wall outlet
2. Take an Ethernet cord, and plug one end into your Linksys, and the other end into your router or PC/Laptop.
3. Before proceeding, be sure to have a pen ready as we will need to record some information in the steps that follow.
4. Plug a phone into the **Phone1** port of the ATA.
5. From the phone that's plugged into the ATA, press the hook/flash key and dial the star (\*) key four times.
6. You will be presented with a recording saying, "*Configuration menu. Please enter option followed by the pound key.*" Enter the keys **1 1 0 #**
7. The IP address of your ATA will now be spoken to you. For example **192.168.1.100**. Please write this number on a piece of paper, as you will require it in the next step.

8. Now open a browser, and navigate to the address that you wrote down in step (7). Simply type that address into the address bar of your browser. A blue/purple screen similar to the following will be displayed. Click **Admin Login** toward the right of the page

The screenshot shows the Linksys Voice configuration interface. The top navigation bar includes the Linksys logo, the device name "Phone Adapter with 2 Ports for Voice-Over-IP", and the model "PAP2". The main content area has a left sidebar with "Voice" and "Info" tabs. The "Info" tab is active, showing a menu with "System", "User 1", and "User 2". The "System" menu item is selected, and the "Admin Login" link is circled in red. Below the navigation, there are sections for "System Information", "Product Information", and "System Status".

System Information	DHCP: Enabled Host Name: LinksysPAP Current Netmask: 255.255.255.0 Primary DNS: 192.168.1.254 Secondary DNS:	Current IP: 192.168.1.75 Domain: lan Current Gateway: 192.168.1.254

9. Now, click the **Line 1** menu item at the top

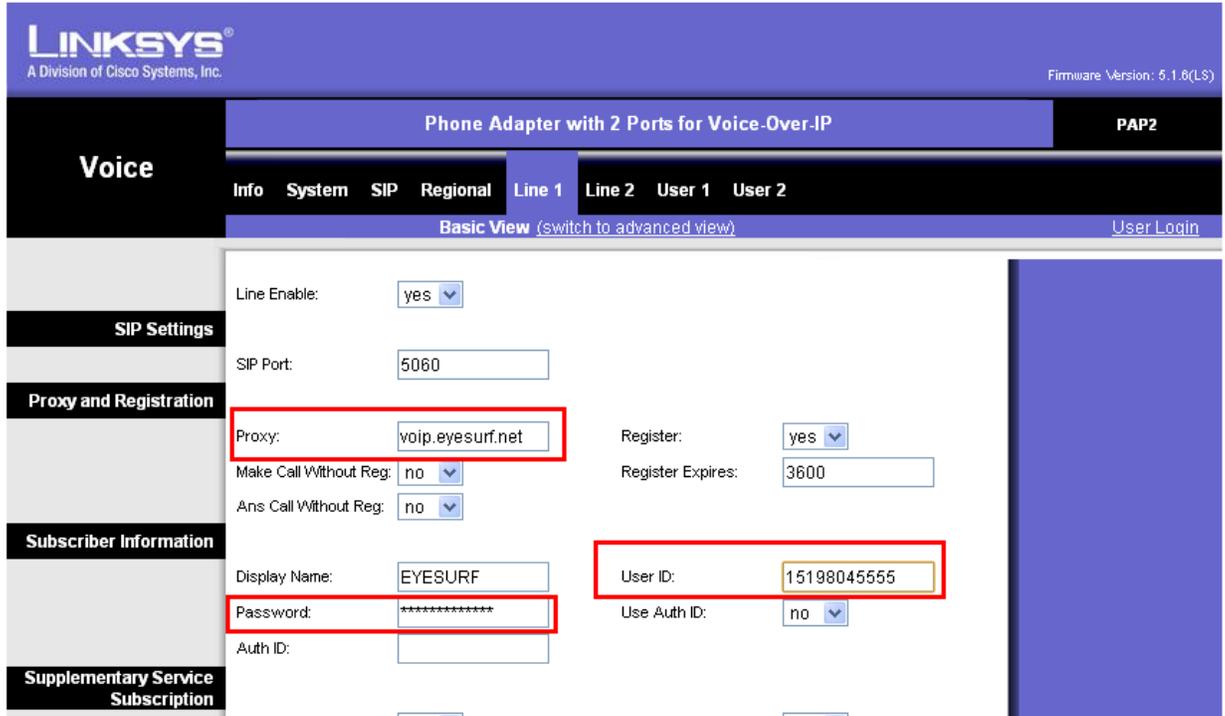

The screenshot shows the Linksys Voice configuration interface, similar to the previous one. The top navigation bar includes the Linksys logo, the device name "Phone Adapter with 2 Ports for Voice-Over-IP", and the model "PAP2". The main content area has a left sidebar with "Voice" and "Info" tabs. The "Info" tab is active, showing a menu with "System", "SIP", "Regional", "Line 1", "Line 2", "User 1", and "User 2". The "Line 1" menu item is circled in red. Below the navigation, there are sections for "System Information", "Product Information", and "System Status".

System Information	DHCP: Enabled Host Name: LinksysPAP Current Netmask: 255.255.255.0 Primary DNS: 192.168.1.254 Secondary DNS:	Current IP: 192.168.1.75 Domain: lan Current Gateway: 192.168.1.254

11. You will be presented with the following screen indicating that the device is resetting

**PAP2 is updating your configuration. Unit may reset.  
You will be redirected to the configuration page in 5 seconds.  
If not, you can click [HERE](#) to return to the configuration page.**

That's it! Your ATA device should now be configured properly. If you continue to experience any troubles, please phone technical support at 519-804-SURF and push "2" for Technical Support.
